## WALL MOUNT

Included with your time clock, you will find a metal back plate, a LAN cord, a power adapter, four drywall anchors, four screws, and two small bracket screws. You will need your own Phillips-head screwdriver.

### MOUNTING YOUR TIME CLOCK ONTO YOUR WALL

1. Select a location for your time clock near a power outlet and LAN port (if applicable).
2. Place the provided mounting template against the wall (shown at right). Drill holes through the targets using a 1/4" (6.35mm) drill bit.
3. Insert drywall anchors into the center of the wall marks.
4. Align the metal back plate with the holes. Ensure that the prongs are facing away from the wall, then secure the back plate to the wall with the included screws.
5. Attach the power adapter and the LAN line (if applicable).
6. Align the two slots on the back of the clock with the two prongs on the back plate. Push down slightly to ensure the clock is securely fastened.
